3. INTRODUCTION

In the current cybersecurity landscape, privileged access represents one of the most critical and frequently exploited attack vectors, particularly in ransomware incidents, credential compromise, insider threats, and advanced persistent threat activities observed across both public and private sector organisations over the past five years. Threat actors increasingly leverage compromised or mismanaged administrative credentials to gain persistent access, escalate privileges, and move laterally across networks while evading traditional perimeter-based security controls.

For the Trans-Caledon Tunnel Authority (TCTA), as a strategic State-Owned Entity responsible for critical infrastructure, financial systems, and sensitive operational data, the misuse or compromise of privileged accounts could lead to significant operational disruption, regulatory exposure, reputational damage, and loss of data integrity. This risk is further heightened by hybrid ICT environments, third-party service provider access, and the growing adoption of cloud and enterprise platforms that require controlled and auditable elevated access.

In alignment with TCTA's Cybersecurity Strategy, Zero Trust security principles, and governance obligations under frameworks such as the NIST Cybersecurity Framework (CSF 2.0), ISO/IEC 27001, POPIA, and PFMA, the Authority seeks to implement an enterprise-grade Privileged Access Management (PAM) solution to strengthen identity-centric security controls and enhance overall cyber resilience. The proposed PAM solution will provide centralised privileged credential vaulting, just-in-time and least privilege access enforcement, session monitoring and recording, automated approval workflows, comprehensive audit trails, and integration with existing Identity and Access Management (IAM), Security Operations, and ICT infrastructure.

This initiative will support improved governance, audit readiness, and proactive risk mitigation by ensuring that all privileged access across on-premises and cloud environments is securely managed, continuously monitored, and governed in a controlled, policy-driven, and fully auditable manner.

4. SCOPE OF WORK

TCTA seeks to appoint a qualified and experienced service provider to design, implement, configure, integrate, and support a cloud-based enterprise-grade Privileged Access Management (PAM) solution with 100 licenses across its ICT environment, including on-premises, cloud, and hybrid infrastructure. The PAM solution must provide centralized governance, control, monitoring, and auditing of all privileged accounts, credentials, and elevated access activities to reduce identity-related cyber risks, enforce least privilege principles, and strengthen TCTA's overall cybersecurity posture in alignment with NIST CSF, ISO/IEC 27001, POPIA, and PFMA requirements.

The solution must enable secure management of privileged identities for internal administrators, executives, third-party vendors, and service providers, while ensuring full visibility, traceability, and accountability for all privileged actions performed across critical systems, applications, databases, servers (Windows and Linux), and network infrastructure. The appointed service provider will be responsible for end-to-end implementation, including solution architecture (presented and approved at TCTA Enterprise Architecture Committee), deployment, configuration, integration with existing ICT and security platforms, knowledge transfer, documentation, and post-implementation support.

4.1. DETAILED DESCRIPTION OF GOODS/SERVICES

- 8.2. Price must be reflected Excluding and Including VAT.
- 8.3. All prices must include all costs applicable.
- 8.4. Prices must be firm and unconditional.

8.5. Preferential Points Calculation

- 8.5.1. The following formula must be used to calculate the points out of 80 for price in bids with a Rand value equal to or above R30 000 and up to a Rand value of R50 million, inclusive of all applicable taxes:

$$P_s = 80 \left(1 - \frac{P_t - P_{\min}}{P_{\min}} \right)$$

Where-

P_s = Points scored for price of bid under consideration;

P_t = Price of bid under consideration; and

$P_{\min}$ = Price of lowest acceptable bid.

- 8.5.2. The 80/20 preference point system may apply and that the lowest acceptable tender will be used to determine the applicable preference point system
- 8.5.3. The weighting of the Preferential points calculation is as follows:

Specific Goals	=	20
Price	=	80
Total Points	=	100
